No. AHV/AWB/Misc-01/2023-24.—Whereas, comfortable and good housing is the right of all domesticated animals. It directly impacts their overall health, psychology, welfare and production.

- (i) "FTTX" means Fiber to the x;
- (ii) "IP-1" Infrastructure Providers Category 1;
- (iii) "ISP" Internet Service Provider;

- (vi) "RWA" means Residential Welfare Association;
- (vii) "TERM" Telecom Enforcement Resource & Monitoring (Agency);
- (viii) "TRAI" Telecom Regulatory Authority of India;

18.3. Introduction :

There is massive surge in the indoor voice and data consumption in the country after the pandemic. With the new WFH (Work-from-Home) and work-from-anywhere paradigms, emergence of 5G is expected to create huge opportunities for extension of ubiquitous, reliable and high speed digital infrastructure into the homes and inside residential buildings, and lead to huge growth of shared in-Building Solutions sites.

18.4. Applicability :

These regulations of installation of telecom infrastructure and associated cabling and in-building solutions shall be applied to all commercial, residential and official buildings (including government buildings), etc. The provision in this chapter is a part of National Digital Communications Policy, 2018.

Occupancy-cum-Completion certificate to a building to be granted only after ensuring that the CTI as per the prescribed standards is in place and an undertaking by the Architect or Engineer to be insisted to certify that building has ensured common access to all digital infrastructure to all Service providers in accordance with plan of creation of CTI. Provision of visit from Department of Telecom (DoT) / TRAI officials along with joint inspection with TSPs - who may suggest any relevant modifications in the plan to be ensured.

18.5. Responsibilities of Architect, Builder and building owner :

1. While preparing the building plans, there is a need to mandate to have properly demarcated sections within buildings and on roof tops for housing Broadband / digital connectivity infrastructure / antenna. These areas should have access to power supply for reliable, always-on services.
2. Access to building as well as CTI facilities inside the building should be available on a fair, transparent and non-discriminatory manner to all Service Providers / IP1's.

3. The Service Providers / IP1's should have unrestricted access for maintenance work.
4. The permission to in-building access and/or CTI facilities inside the building should not be seen as a source of revenue generation for builder(s)/RWA(s) but as a means for facilitating penetration of broadband access and thereby helping in socio- economic growth of all the residents.
5. Charges (rentals/power rates etc.) levied to the TSPs/IP-1s should be fair, transparent and non-discriminatory and should be on residential rates.

18.6. At Layout Level :

While developing Greenfield cities/towns, the layout plans should clearly indicate the telecom as Utility infrastructure lines. Standards followed for utility planning shall be published and work shall be done by the respective department for bringing in the standardization of the utility coding and sequences. The placement and sequence of above and below ground utilities at the appropriate location in the right-of-way to be ensured for unconstrained movement as well as easy access for maintenance. Telecommunication cables should be placed in a duct that can be accessed at frequent service points with sufficient spare capacity to enable scaling and future expansion, and empty pipes (large size hume pipes / HDPE pipes) should be laid before planting trees in order to accommodate additional infrastructure. Digital Readiness Rating of Buildings / Society in line to the GREEN ratings shall be created where the existing and new buildings shall be rated on standardized parameters such as; but not limited to; Digital Infrastructure access, provisions for Emerging Technologies, Maintenance and Operational ease to TSPs / IPv1, Quality of Wireless Services, Quality / Interchangeability ease of Wireline Services till each Unit Security, redundancy and Expandability of the digital infrastructure etc. A detailed rating parameters and calculation mechanism of Points / Stars shall be devised and benchmarked for all new / retrofitting of buildings/ societies. Digital Asset repository which will ensure Proper planning and mapping of utilities through GIS is necessary especially when the alignments of telecommunication cables are identified. Design criteria and standards Utilities should meet the following criteria:

- Telecommunication cables should ideally be placed below the parking area or service lane, which may be dug up easily without causing major inconvenience. Where this is not possible, the cables may be placed at the outer edge of the right-of-way.
- There is a need to reduce conflicts with pedestrian movements is to place telecom boxes in easements just off the right-of-way. Where this is not possible, they should be placed within parking or landscaping areas. If cables have to be located in the pedestrian path, a space of at least 2m should be maintained for the through movement of pedestrians. Telecom boxes should never constrain the width of a cycle track.
- In order to minimize disruptions, cables should be installed with proper maintenance infrastructure.

18.7. Other procedures for setting up In-Building Solution (IBS)/Fiber Networks

1. There is a need to promote installation of In-Building Solution (IBS) / Smart Connectivity infrastructure, where there is a poor connectivity in terms of weak signal strength inside the office, shopping mall, hospitals, multi-story building, education institutions and the objective has to be to strengthen quality of service of the voice & data' of mobile and Fiber broadband network and access to digital services being offered by TSP and IP1 's

A. Procedures of obtaining IBS-NOC during plan approval and completion:

- (a) While submitting the proposed Building plan seeking approval from the relevant sanctioning Authority, applicant shall also submit.
 - (i) A complete Service Plan for IBS-infrastructure along with required specifications (in consultation with, and certified by a credible Telecom Networking hardware consultant).
 - (ii) An undertaking that such IBS Infrastructure, when constructed shall be available for sharing by various TSPs/IP-Is.
 - (iii) Such Service Plan (IBS) shall be forwarded by the concerned Local Authority to the Telecom Enforcement Resource and Monitoring (TERM) cell of the State (external NOC agency) for approval NOC.
 - (iv) During the Joint Site Inspection of the completed building structure the TERM cell shall undertake inspection of the constructed/installed IBS infrastructure for issuance of NOC for OCC.
- (b) The Local Authority shall liaise with the TERM cell as per its relevant online/offline process of communication to seek the relevant NOCs within the specified time as per the Service Charter/ Service Guarantee Act and rules in place. Separate communication from the applicant shall be needed to secure the IBS NOC.

- B. Provision of IBS components in building premises: (as per NBC 2016)
